STONE CLADDING BROCHURE 2022

Bespoke service

As well as our range of stone cladding we can also produce a bespoke colour range for you

Short lead times

Due to having our own UK production site we can turn orders around Quickly

Stone Cladding

Needs little or no maintenance as a great product cover walls internally and externally

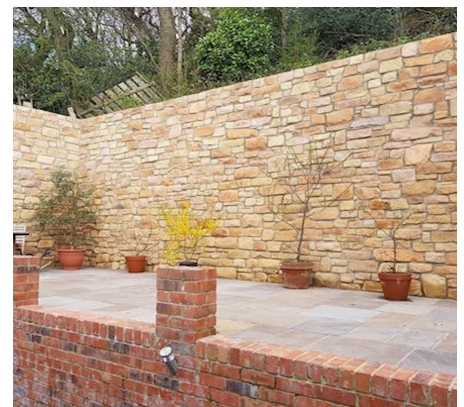

Why use our Stone Cladding

Our stone cladding is a light weight Eco friendly hand made stone Cladding veneer that is suitable for use both internally and externally. Used by builders, architects, developers and the general public . Arc Home Developments products are treated as if they were natural stone by capturing the nuances , colours , textures and shape that occur in nature.

- Allows for greater detail in design
- Large areas can be covered quickly
- Large range of styles and colours

Our stone cladding veneers can transform a feature wall as a one off design in either a home or commercial development adding value as well as enhancing its appearance
